

DemaTron 70

Detacher with cowside display of milk weight

ICAR approved milk weights — highest accuracy with conductivity monitoring.

Simple, convenient controls — ergonomic control panel at each stall plus optional remote start or easy start (vacuum only). Displays milk weights with I.D.

Standard Features:

- **Central start and clean** — push one button to start milk or wash mode for the whole parlor.
- **Reattach/manual milk capability** — for handling of special cows.
- **Drop down feature** — easier access to the cow in parallel parlors.
- **Vacuum on delay** — better vacuum stability

Optional features:

- Kick-off alarm
- Milk save feature
- Back flush control
- One-time sort with identification

Basic parlor management plus milk weight evaluation with DairyPlan C21.

DeMax and Dematron family features

Requested by today's modern dairy producers

Herd management function — all detachers can communicate with Dairy Plan C21.

Master control unit mounting — stays clean and dry in cabinet or subway.

Labor saving programmable features:

- Push button functions start/stop, manual and wash
- Detach settings, flow rates, and delay times
- Pulsation settings, stimulation time and rates and ratios

Flexibility of parlor design:

- Stand alone
- Subway
- Medallion cabinets
- Vacuum rope option
- Compressed air operated chain option

Durability — low maintenance:

- Master electronic located out of harms way
- All three sensors made of Radel material
- Waterproof control panels

Operates pulsator:

- Stimupuls Apex M
- Autopuls Apex M
- Pulsator shutoff at unit removal

Simplicity — master electronic is central connection point for shifting valve, sensor, and pulsator.

Upgradable — add-on features within family.

Neat, clean installation.
